

## 14<sup>th</sup> Question

14. A - Using the Transactions table, write a query to find the ItemID that had the largest drop in sales compared to the previous month in 2024. Display the ItemID, Month, CurrentMonthSales, PreviousMonthSales, and the SalesDrop.

B - Write a query to find the number of employees directly reporting to each manager in the OrganizationStructure table. Then, calculate the average number of direct reports across all managers and filter only those managers who have more than the average number of direct reports. Display the ManagerID, ManagerName, and DirectReportsCount.
